The diagram illustrates the Content Aggregation System architecture. At the top, two cylinders represent data sources: 'Content Provider' (302) and 'Learning Resource Provider' (304). The 'Content Provider' cylinder contains 'University Courses', 'College', and 'Corporate Information'. The 'Learning Resource Provider' cylinder contains 'Textbook', 'Hardware', 'Software', and 'Financial'. Both cylinders have an 'Agent' box at the top. A central rectangle labeled 'Aggregator' receives data from both cylinders. Below the aggregator are two client boxes, each labeled 'Client 310'. A wavy line connects the number '308' to the Client 310 boxes.

```

graph TD
    CP[Content Provider  
302] --- AGG[Aggregator]
    LRP[Learning Resource Provider  
304] --- AGG
    AGG --- C1[Client 310]
    AGG --- C2[Client 310]
    308 --- C1
    308 --- C2
  
```
